WHY TURTLES?

Since 2004, the Dubai Turtle Rehabilitation Project (DTRP) has seen the release of over 2,000 rehabilitated turtles back into their natural habitat. After initial treatment at Burj Al Arab Jumeirah's Aquarium, they are brought to health at the Turtle Rehabilitation Sanctuary at Jumeirah Al Naseem, where you can see them in our lagoon. All seven species of marine turtle are listed as vulnerable to extinction, endangered or critically endangered - the DTRP is dedicated to the conservation of these precious marine creatures.

We are delighted to share a dedicated hotline that goes directly to the rehabilitation center in the event of a turtle being found in distress

will go towards the Turtle Rehabilitation Project*

SO MUCH MORE THAN AN AFTERNOON TEA

The brainchild of our very own Pastry Chef Julien Jacob, the Turtle Tea evolved from his passion for the environment and his personal love of art. In partnering with acclaimed artist, philanthropist and friend Idriss B, Chef hoped to draw attention to this vital institution and the importance of sustainability at this moment in time.

Chef Julien's selection of sweet and savoury delicacies is inspired by nature using locally-sourced produce where possible and is unique for being an entirely vegan offer.

Furthermore, a contribution from each and every 'Turtle Tea' sold will go to the rehabilitation project.

So, thank you.

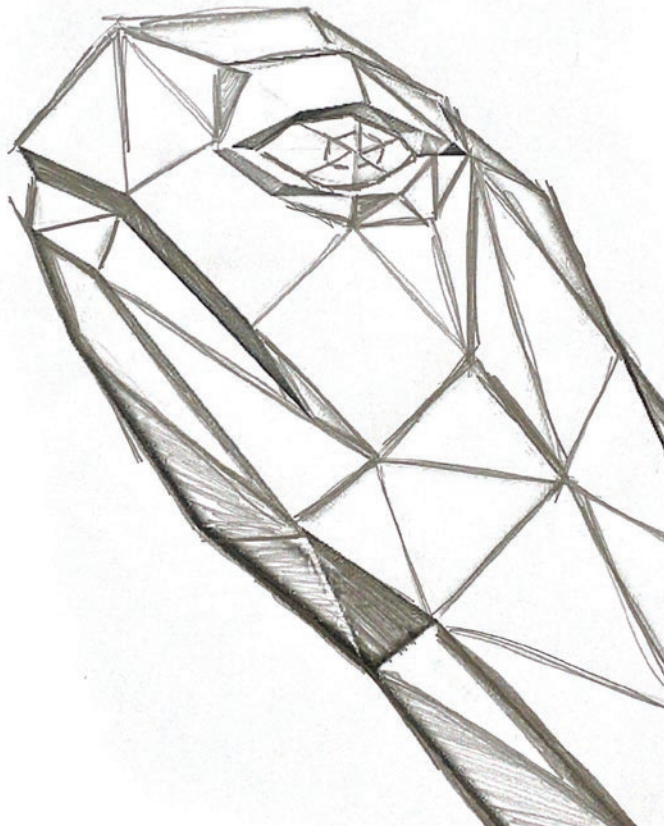

TAKE A TOUR AND COLLECT THE TURTLES

Take a walk around the grounds of Jumeirah Al Naseem and 'collect' the nest of turtle statues created as part of Idriss B's eminent 'Art Collection'. Designed to show that all art is indeed an imitation of nature, and to serve as a fitting reminder of the importance of bio-diversity, these turtles will in time themselves contribute to the rehabilitation project.

WANT TO KNOW MORE?

Crafted from eco-friendly recycled materials, the Al Naseem Turtle Art Collection was fabricated using 40 different 3D printers over 8 days, with the printers working 24 hours a day.

ABOUT THE ARTIST | IDRIS B

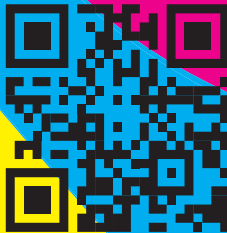

Born and raised in Paris, Idriss has been obsessed with art since childhood and has spent his entire professional life working in the field.

With his considerable knowledge of new materials, combinations of different sources and various handmade art objects, Idriss began to think of a new collection. The 'Art Collection' is continually evolving to reflect the time in which it is being made.

This collection was made by molding his vision of contemporary art to create polygonal animal forms in different sizes which he continues to sell to collectors as limited edition pieces.

"Art Collection is the fruit of my creativity and will be growing with time. Each style is a limited edition and is unique, relevant to its singular environment."

Idriss B.
